Art Unit: 3652

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- 1) the species of Figs. 1-4,
- 2) the species of Fig. 5,
- 3) the species of Fig. 6, and
- 4) the species of Fig. 7.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner: the species of Figs. 1-4 shows two frames and a strap wherein each frame has a plurality of clips to retain golf clubs, the species of Fig. 5 shows a bag or a cover with a strap to contain golf clubs and to carry, the species of Fig. 6 shows a strap, two blank frames, and a hinged lid which has a plurality of clips to retain golf clubs, and the species of Fig. 7 shows a strap, two blank frames, and an open bag to container golf clubs or other items.

The following claim(s) are generic: it appears that none of the claims is generic.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special

Art Unit: 3652

technical features for the following reasons: none of the recited species relates a single invention as described in section 2 above.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
